

Dear Prof. Yongju Kim,

We are very delighted to invite you to The 2017 International Small-Angle X-ray Scattering Symposium which will be in Pohang University of Science and Technology, Pohang, Korea, May 03-05, 2017. This syposium will provide many interesting lectures to discuss all aspects of Nanostructures based on Small-Angle X-ray Scattering (SAXS). The arranged sessions will include basic theory of SAXS, Data analysis, Solution phase measurement, and Prediction of packing by simulation. We will seek to share experience and best practices on their work to improve our science. In addition, we will show the audiece the new field of SAXS applications with new technology.

We wish that your participants will contribute many improvement in this research field.

Thanks for your consideration in advance.

Yours sincerely,

A handwritten signature in blue ink that reads 'Jehan Kim'.
